Your Project, Our Role...

The Preservation Collaborative compiled a historic report about the history of the Danvers State Asylum for the Danvers Library Archives.

The report covered history from development to demolition. It included some rare archival drawings from the initial design of the hospital.

The final report was delivered to the archives as a record for future generations.

The Preservation Collaborative can help clients understand their historic buildings through research and inspection. Multiple trades allow a clear report to be created under one roof.
