

Doctor Offices

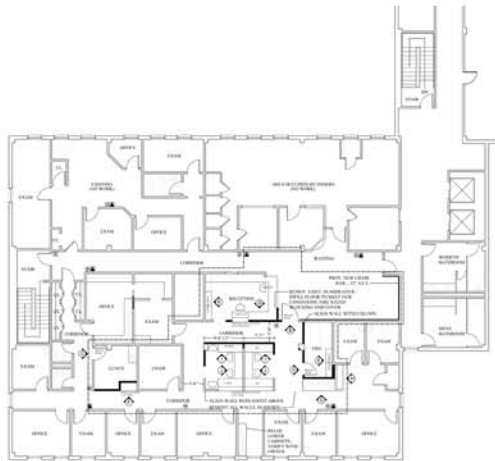

Lawrence and Haverhill Massachusetts

Project Highlights

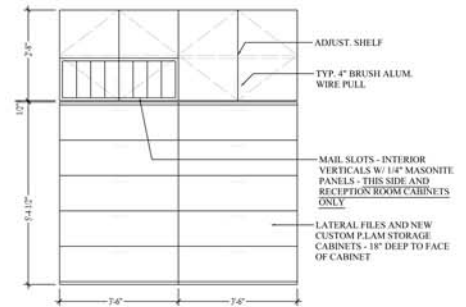

As-built documentation helped owners conceptualize space and how to tweak it.

Tenants moved into space after successful build out.

Building (right) and details of plans and drawings (below).

Your Project, Our Role...

Our firm documented existing conditions, space plan and construction documents for King Design Associates. Their client wanted a new medical office space within an existing build out.

Our firm developed drawings from start to finish for the project. Everything from the floor plans to detail elevations were created for project bidding.

The Preservation Collaborative can develop construction drawings for your project. No matter if it is a small project or a large redevelopment, we can assist with all phases of work.
