Your Project, Our Role...

The Medford Opera House was designed in 1880 by noted architect Charles B. Dunham. The building boasted an 800 person auditorium and a hall for the Medford Elks Lodge.

The building suffered two serious fires and was decapitated in the mid 1950's. Our firm documented this historic structure for potential restoration. The new building features a restored opera hall and office space.

The Preservation Collaborative has worked on multiple re-creation projects for clients. Our firm can assist with bringing damaged buildings back to life, often saving them from imminent destruction.
