Your Project, Our Role...

The Preservation Collaborative rendered the 1899 Salem Street Fire Station in Medford. This building serves the City as its oldest operating fire house. The City has restored the building and maintains it.

The Preservation Collaborative offers rendering services to clients. Our models offer the perfect way to step back in time and walk into a historic building as it once appeared.

Let us help render your buildings today!

We produced renderings of the historic appearance of the building for study. They were created using the original plans on file at the Massachusetts State Archives.
